

Pico Analyser  
top

This image shows the top layer of a PCB layout for a Pico Analyser. The board is rectangular with a central white rectangular area. The layout includes several circular holes along the top and bottom edges, and two small circular holes on the left and right sides. There are also two small circular holes near the top center and two near the top right. A small rectangular cutout is located on the left side. The text "Pico Analyser top" is centered in the white area.

Pico Analyser  
bottom

This image shows the bottom layer of a PCB layout for a Pico Analyser. The board is rectangular with a central white rectangular area. The layout is highly detailed, featuring a complex network of white traces and pads. There are several circular holes along the top and bottom edges, and two small circular holes on the left and right sides. The text "Pico Analyser bottom" is centered in the white area.
